

PRESS RELEASE

Audiovisual Report of the Sener Foundation's activities in 2022

- The document compiles the most relevant actions carried out by the Sener Foundation over the course of 2022.
- "A challenge for science," supporting research projects and awards for the best doctoral theses in engineering are some of the most notable activities.

Madrid, July 27, 2023. The [Sener Foundation](#) has published an [Audiovisual Report](#) on the activities performed over the course of 2022. The document seeks to compile the most significant initiatives carried out by the company in the most recent financial year.

The projects mentioned in the report include the work done by the Sener Foundation volunteers on the project to "[Improve the socio-production chain for whole cane sugar in Sierra de Piura \(Peru\)](#)", for which they conducted an engineering study to improve this process. Also noteworthy were the R&D projects that the company carries out with universities, specifically with the [Carlos III University of Madrid](#) and the [Polytechnic University of Madrid](#).

The report also provides information on the project "[A challenge for science](#)". The initiative, aimed at promoting scientific and technical vocations in high school students, was presented the [STEAM Euskadi](#) seal and received, in December 2022, the [Educaweb](#) Award for Academic and Professional Guidance in the Company category.

Promotion of scientific research

In 2022, the Sener Foundation continued with its work to promote scientific research at the highest level through the [Sener Foundation Award for Best Doctoral Thesis in Engineering](#). Plus, in order to reward research, scientific and technical excellence and quality, the Sener Foundation continued with its [ST3LLAR Awards](#) for the best undergraduate and Master's Final Degree Project (FDP) in the fields and subjects of the Sener Aerospace Chair at the Universidad Carlos III in Madrid.

On a related topic, in the area of promoting and supporting scientific research, the Sener Foundation completed the project to develop a room-temperature millimeter and submillimeter wave receiver at the [Carlos III University of Madrid](#). It also continued to support the project developed by the Polytechnic University of Madrid to create [smart traffic signals](#).

Partnerships with other entities

As part of its partnerships with similar institutions, the Sener Foundation renewed its agreement with the Lo Que De Verdad Importa (What Really Matters) Foundation to sponsor the 14th Lo Que De Verdad Importa Values Congress in Bilbao.

In the field of cooperation, Sener's staff completed the volunteering project to "Improve the socio-production chain for whole cane sugar in Sierra de Piura (Peru)". This initiative, carried out in partnership with the NGO Ingeniería para la Cooperación – Lankidetzarako Ingeniaritza (ICLI) and the University of Piura, ended with the delivery of an engineering study to improve the technical aspects of this production process.

Promotion of scientific and technical careers

In 2022, the Sener Foundation continued its support of the "Challenge for Science" project, which seeks to promote scientific-technical careers among kids and teens, and specifically in high school courses. This project is carried out in collaboration with the [Sener Group](#), whose employees introduce engineering, technology and science to kids in schools by presenting them the challenges these engineers face in their daily lives.

This project relied on the cooperation of the [Spanish Foundation for Science and Technology](#), which is part of the Spanish Government's Ministry of Innovation and Science. It has also received the [STEAM Euskadi Sariak](#) seal, presented by the Department of Education of the [Basque Government](#) and [Innobasque](#), the Basque Innovation Agency.

In December 2022, "A Challenge for Science" also received the [Educaweb Award for Academic and Professional Guidance](#) in the Companies category.

About the Sener Foundation

The Sener Foundation was created in May 2002 by the Sener Engineering Group and the Sendagorta family to promote humanitarian initiatives and activities. Over its years of activity, the Sener Foundation has been working in social services at the community level by developing social responsibility in professional activities, training people, and promoting research at the highest level.

The activities carried out by the Sener Foundation include encouraging scientific research at the highest level by presenting prizes, such as the Award for Best Doctoral Thesis in Engineering, sponsoring the Air and Space Force Award for university aerospace research, and supporting R&D projects in technology centers and universities. Similarly, the Sener Foundation promotes corporate volunteering among Sener staff and encourages young people to pursue careers in science through "A Challenge for Science".
